EDUCATION

Bachelor of Technology, SRM University
CGPA: 8.66

August 2022 - May 2026

SKILLS

DevOps	Kubernetes, Docker, Ansible, ArgoCD, Jenkins, Terraform
ML	PyTorch, LLMs, Transformers, DC-GANs
Web	NodeJS, SpringBoot, Sveltekit
General	Linux, Git, Proxmox, Bash
Languages	Python, Java, Go, C++

EXPERIENCE

Research Fellow
HyperVerge

January 2024 - May 2024
Remote

- Developed a suite of Transformer models for liveness verification that streamlined workflows, enabling a **1,000+** queries per day while reducing operational costs by **20%**.
- Applied mathematical algorithms to the data, improving the model performance by **23%**.
- Developed a Realtime **Region of Interest** pipeline for facial feature extraction using **MediaPipe** which improved model training times by **27%**.

PROJECTS

Shell Script Suite for Cloud Workflows. Consolidated container orchestration, environment setup, and system monitoring into an integrated toolkit. ([Github](#))

- Automated container lifecycle management, reducing manual deployment steps by **90%**.
- Standardized cross-platform environment configurations, slashing onboarding and configuration drift by **75%**.
- Built monitoring utilities that saved over **10 hrs/week** on troubleshooting and maintenance.

Chatbot-Room. Architected and implemented a **SpringBoot** web application with **bidirectional WebSocket** endpoints, supporting up to **200** concurrent users in real-time chat rooms. ([Github](#))

- Integrated FastAPI microservices to serve LLM-powered chatbot responses at a throughput of **500+** messages per minute, orchestrating low-latency AI inference pipelines.
- Designed session management and message-broadcasting logic to reliably synchronize state across **dozens** of chat rooms.

CERTIFICATIONS

Kodekloud - Kubernetes Course - Mastered Kubernetes deployment, configuring services for horizontal scaling. ([Certificate](#))

Kodekloud - Jenkins Course - Implemented Jenkins to maintain CI/CD Pipelines. ([Certificate](#))
